

AM-STICK-WB

Bluetooth communication module for the latest generation of frequency inverters and ECblue fans (motor sizes D+G) (2nd edition)

Pluggable add-on modules for function extensions of the “Icontrol Basic” and “Fcontrol Basic” frequency inverters without an integrated display, as well as ECblue motors and fans. With the AM-MODBUS-WB add-on modules, access to the respective frequency inverter or ECblue fan can take place wirelessly using Bluetooth. For this purpose, the ZIEHL-ABEGG “ZAsset mobile” app for mobile terminals is available in the Android and IOS Store.

The devices can be integrated into MODBUS networks with the AM-MODBUS-WB add-on modules. Whole groups of frequency inverters or ECblue motors and fans, which are equipped with these AM-MODBUS-WB add-on modules, can be addressed quickly and automatically by means of a ZIEHL-ABEGG UNIcon control module with MODBUS master function. These devices are then controlled conveniently by the UNIcon “master” device.
